

Robin Chung

Lead Front End Developer

Experience

Alliander

LEAD FRONT END DEVELOPER 2020 - now

Created the foundation for two greenfield Front End projects. Created the underlying design system, ArcGIS integration and maintained the systems. Educated best practises within the company.

Swapfiets

FRONT END DEVELOPER 2019 - 2020

Developed the first design system for the company including visual snapshotting in Angular. Co-developed the marketing and account websites used today in over seven countries.

Anva

LEAD FRONT END DEVELOPER 2018 - 2019

Developed from scratch their cloud proposition called Anva Hub. Created a fully keyboard accessible app with advanced theming options in a monorepo structure.

Centraal Beheer

ANGULAR EXPERT 2018

Helped the company transition into component based thinking and helping the transition from AngularJS to Angular.

PON Automotive

APP DEVELOPER 2017 - 2018

Helped develop a white label app with advanced building scripts to inject branding on build time for car companies such as Volkswagen, Audi and Skoda.

VodafoneZiggo

LEAD FRONT END DEVELOPER 2016 - 2017

Helped aid the marketing and webshop migrations of a large merger (Ziggo and Vodafone), including integration of new offers. Spearheaded component based development and thinking within the teams.

Parateum

FRONT END DEVELOPER 2015 - 2016

Helped create new AngularJS applications, thought out the entire UX flow and designed an iconset for their IVR (interactive voice response) application.

HAN Univerity of Applied Sciences

INTERN 2013 - 2014

Designed and prototyped a concept for the flipped classroom where students were responsible for creating personalised studybooks and could compare their reflective work with other students.

LG Electronics

INTERN 2012

Helped improve the content used in their custom CMS to improve the support for customers.
